## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 – 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent Application No. 2007/0259688 (Forte) in view of U.S. Patent No. 6,266,539 (Pardo).

With respect to claims 1 – 3, 9, 11 – 13, 19, 21 – 23, 27 and 29, Forte teaches a method and system where a PBX 14 receives an incoming call directed to the PBX (Paragraph 0025) , routing the call based on user preferences (Paragraphs 0021, 0033 and 0034) and routing to a computing device (Paragraph 022).

Forte discloses the instant limitations except for the docking station aspects. However, note that Pardo teaches such (see at least Figs. 10A, 10B, 11A and 11B). It would have been obvious to one of ordinary skill in the art to have incorporated such a docking station in which once removed from the docking station the calls are switched to a preferred device as disclosed by Pardo into the Forte device, as such would only entail one PDA system for another. Note that with respect to Pardo, when the PDA is in the docking station, calls are routed to the PDA (digital) and when the PDA is not in the

docking station calls are routed to the base station, which acts as a regular telephone (analog).

With respect to claims 4, 14 and 24 note paragraphs 0021 and 0033.

With respect to claims 6 and 16, such would be inherent.

With respect to claims 7 and 17, note paragraph 0022.

With respect to claims 10 and 20, note paragraphs 0046 and 0049.

With respect to claim 26, such a limitation is inherent.

With respect to claims 8, 18, 28 and 30, an icon being displayed on a computing device for indicating an incoming call, such is notoriously old in the art and it would have been obvious to one ordinary skill in the art to have provided such wherever it was deemed necessary.

With respect to claim 30 and the limitation of a headset, such is also notoriously old in the art and would have been obvious to one of ordinary skill in the art to use a headset whenever it was deemed necessary.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1 - 30 have been considered but are moot in view of the new ground(s) of rejection.
